

Remove all occurrences of a string

$s = \text{"daabcbdaabcbcb"}$ $part = \text{"abc"}$

"d a b a b c"

"dab"

① str.find(substring) \Rightarrow

returns first occurrence to
starting index

2) `str.erase(start pos, end pos)`

str.find(part) part.length()

Code

```
Code
while (s.length() > 0 && s.find(part) < s.length()) {
    s.erase(s.find(part), part.length());
}
```

3

```
return s;
```
